

## REPORT A PROBLEM

Have you ever noticed standing or flowing water in an area of your neighborhood that doesn't belong there? What about a busted water line or sprinkler gushing into the street? If the water you see pouring into the street comes from public water lines then that water was paid for by you and other taxpayers.

### **We want your help**

In an effort to improve and maintain area infrastructure we ask that you, our resident, take part in our awareness campaign to help keep up the integrity of our water and sewer systems in optimal condition.

### **What are we requesting?**

Simply put, we're asking residents to be aware and mindful of water and sewer related problems and to do their part by reporting the problem areas.

The faster a problem is reported, the faster it can be remedied. By providing your insight, we all benefit.

## **If you see a water or sewer problem, report it!**

**When you see a water leak or find a water/wastewater related issue submit a problem report to your District Operator, Eagle Water Management at:**

**(281) 374-8989**
